# ICC-ES ESR# 1398 VERIFIES THAT ALUMAWOOD® SHADE STRUCTURES MEETS CODE REQUIREMENTS

Alumawood® Shade Structures, manufactured by Amerimax Exterior Home Products, recently received an evaluation report (ESR# 1398) from ICC Evaluation Service (ICC-ES), providing evidence that Alumawood® Shade Structures meets code requirements. Building officials, architects, contractors, specifiers, designers and others utilize ICC-ES Evaluation Reports to provide a basis for using or approving Alumawood Shade Structures in construction projects under the International Building Code.

ICC-ES President Shahin Moinian explains why ICC-ES Evaluation Reports are so important. Amerimax Exterior Home Products can now reference the evaluation report to ensure building officials and the building industry that the product meets I-Code requirements,” Moinian said. “Building departments have a long history of using evaluation reports, and ICC-ES operates as a technical resource with the highest quality of product review for the building department. Final approval of building products is always in the hands of the local regulatory agency.”

ICC-ES thoroughly examined Amerimax Exterior Home Products product information, test reports, calculations, quality control methods and other factors to ensure the product is code-compliant.

A nonprofit, limited liability company, ICC-ES is the United States’ leading evaluation service for innovative building materials, components and systems. ICC-ES Evaluation Reports (ESRs) and PMG Listings provide evidence that products and systems meet requirements of codes and technical standards. ICC-ES also issues environmental reports verifying that products meet specific sustainability targets defined by today’s codes, standards, green rating systems and ICC-ES environmental criteria. ICC-ES is a subsidiary of the International Code Council® (ICC®). For more information, please visit [www.icc-es.org](http://www.icc-es.org).
